Cropper Motors joins Apache Sprayers Dealer network

MOORESVILLE, Indiana, USA, September 28, 2015 – Cropper Motors, an agricultural machinery dealer in Saskatchewan, Canada, has added Apache self-propelled sprayers to its retail lineup.

Cropper Motors is located on Highway 6 North, Naicam, in northeastern Saskatchewan.

“We are very happy to join the Apache Sprayer family,” said John McWillie, Cropper Motors’ agriculture sales manager. “Equipment Technologies is a specialist in the sprayer business, and have been building Apache Sprayers for over 18 years. We are looking forward to selling and servicing Apache Sprayers.

“Apaches are known for their lighter weight, fuel efficiency, mechanical drive transmission and affordability. The sprayers offer Saskatchewan growers excellent value compared to some of the competitors. They also have a lot less compaction in wet fields.”

In addition to Apaches and other agricultural equipment and implements, Cropper Motors sells Ford cars and trucks, grain trailers, semi-tractors, fuel trucks, tanks and lawn equipment. Cropper Motors has been in business for more than 50 years.

Cropper Motors

Cropper Motors is open 8 a.m. to 6 p.m. Monday through Friday, and 8 a.m. to 5 p.m. Saturday. For more information contact Cropper Motors at 306-874-2011, by email at info@croppermotors.com or online at www.croppermotors.com.

Equipment Technologies is the largest independently-owned manufacturer of self-propelled sprayers in North America. Operating from its 168,000-square-foot headquarters in Mooresville, the company builds and distributes its sprayers throughout Canada, the United States, Ukraine and Australia through a network of independent dealers.

The four Apache models include the AS730, a 173-horsepower, 750-gallon tank machine; AS1030, 225 horsepower, 1,000 gallons; AS1230, 260 horsepower, 1,200 gallons; and AS1230 XP, 300 horsepower, 1,200 gallons.
