Equipment Technologies receives county Extension award

MOORESVILLE, Indiana, November 20, 2014 – Equipment Technologies, the manufacturer of Apache-brand self-propelled agricultural sprayers, was honored November 18 with the Friends of Extension award by the Morgan County Purdue University Extension Office.

The award recognized the company’s long history of partnering with the county Extension office to educate farmers and youth in agriculture.

“We are happy to be affiliated with Equipment Technologies, which has developed a strong agribusiness throughout the years,” said Chris Parker, county Extension director. “Equipment Technologies also has been a strong community supporter and agricultural business liaison with Purdue Extension.”

The award was presented during the county Extension office’s annual meeting at the Morgan County Administration Building in Martinsville.

For the past 10 years Equipment Technologies has hosted Purdue Extension Pesticide Applicator Recertification Program courses at its corporate offices. The company also sponsors the Morgan County Fair and supports the county FFA program. ET also hosted an Indiana State Department of Agriculture listening session in 2013.

Founded in 1997 and privately owned, ET assembles Apache Sprayers at its Mooresville plant. Apaches range in size from the 750-gallon product tank, 160 horsepower AS720 model, to the 1,200-gallon, 275 horsepower AS1220 Plus II model. ET markets Apaches through a vast dealership network in the United States, Canada, Australia and Ukraine. Visit www.etsprayers.com for more information.
