Apache Named Application Product of the Year by No-Till Farmer's Readers Two Straight Years

MOORESVILLE, Ind., January 16, 2012—At a luncheon held at the 20th Annual National No-Tillage Conference in St. Louis, Mo., Equipment Technologies was given the Application Equipment Product of the Year Award for its AS720, AS1020 and AS1220 models of self-propelled sprayers. This marks the second consecutive year Equipment Technologies has received this national recognition from No-Till Farmer readers.

“This is such an accomplishment for these companies to be honored by our readers as No-Till Products of the Year. It says something when no-tillers recognize a product, but it says a great deal when products are honored in back-to-back years. Equipment Technologies should feel proud to receive such national recognition,” says Darrell Bruggink, executive editor and publisher of No-Till Farmer.

According to CEO of Equipment Technologies, Matt Hays, “We love no-tillers. To receive this award two years in a row now further validates the Apache as the businessman’s sprayer. No-tillers are focused on growing the value of their operation over the long haul and know how to invest accordingly, that’s why the 20 Series Apache sprayer and no-till practices go hand-in-hand. I would also like to emphasize that our product is the result of a continual team effort from our employees, dealers and customers to have the very best product possible.”

Equipment Technologies is the largest independently-owned manufacturer of self-propelled sprayers in North America. Operating from its 146,000 square foot headquarters in Mooresville, Ind., the company distributes its sprayers throughout North America, Ukraine and Australia through a network of independent dealers.
