**Hat Trick for Apache Sprayers, Named “Application Product of the Year” Three Consecutive Years**

MOORESVILLE, Ind., January 14, 2013—At a luncheon held at the 21<sup>st</sup> Annual National No-Tillage Conference in Indianapolis, Ind., Equipment Technologies was awarded Application Equipment Product of the Year Award for its Apache self-propelled sprayers. This marks the third consecutive year Equipment Technologies has received this national recognition from No-Till Farmer readers.

“This is such an accomplishment for these companies to be honored by our readers as No-Till Products of the Year. It says something when no-tillers recognize a product, but it says a great deal when products are honored in consecutive years. Equipment Technologies should feel proud to receive such national recognition three years in a row,” says Darrell Bruggink, executive editor and publisher of No-Till Farmer.

According to CEO of Equipment Technologies, Matt Hays, “Sprayers are a critical part of any no-tillers’ operation. To have the readers of No-Till Farmer validate for a third year in a row the Apache self-propelled sprayer as Application Equipment Product of the Year is a tremendous honor. This award comes from the diligent efforts of our employees and dealers, as well as listening to our customers to ensure we produce the very best application product possible.”

Equipment Technologies is the largest independently-owned manufacturer of self-propelled sprayers in North America. Operating from its 168,000 square foot headquarters in Mooresville, Ind., the company distributes its sprayers throughout North America, Ukraine and Australia through a network of independent dealers.
