

THE BEST WARRANTY IN THE INDUSTRY

The best sprayer on the market is backed by the industry's best warranty. Every Apache that rolls off the assembly line comes with a five-year limited warranty. Equipment Technologies is the only manufacturer with full machine coverage for the first two years (<1,000 hrs).

Years 1-2: Limited warranty covers the total machine – parts and labor – for the first two years from warranty start date or 1,000 hours, whichever comes first.

Years 3-5: Limited warranty covers some powertrain and chassis components for parts only from the warranty start date or 2,000 hours, whichever comes first. For a complete list of components covered under warranty for years three through five, visit: apachesprayers.com/warranty.

Engine Warranty: The limited engine warranty is covered by Cummins Inc. for two years or 2,000 hours from the warranty start date, whichever comes first.

“A warranty is a piece of mind thing. Having the five-year powertrain warranty is a definite asset even if you don't use it. It tells me that the Apache folks are quite confident in their machine, even if we've never had to use it.”

– Kevin Zepick from Kipling, SK Canada
