

RAVEN VIPER® 4+ FIELD COMPUTER

Precision ag technology provides cost-effective solutions to help ensure spray applications are as efficient and as accurate as possible. Plus, with benefits like improved crop yields, simplified operations and reduced input costs, using precision technology is no longer a question, it's a necessity. That's why the 2019 model-year Apache Sprayers offers the latest from Raven Applied Technologies: the Viper 4+ field computer.

HOW THE RAVEN VIPER 4+ WORKS WITH APACHE SPRAYERS

The Viper 4+ integrates Raven's full line of products into one networked platform that offers a capacitive touchscreen and an intuitive interface. The Viper 4+ keeps your operation running smoothly with easy job set up and extraordinary and secure data management capabilities.

When you need support, you can depend on the Raven precision package to connect you quickly and securely to the experts. The Viper 4+ works in tandem with the RS1™ antenna to activate the In-Cab Remote support feature to allow Apache Sprayer specialists to securely connect to your sprayer within minutes. All three tools combined, give the 2019 model year Apache Sprayer owners the power to be more accurate, solve problems faster and cover more acres in a day.
